Folks,

Has anyone had a chance to fool around with the new internationalization support in IDL. It may just be my imagination, but 90% of my spam these days is written in Spanish. I'm thinking this might be one of the directions I could grow in comfortably, what with my improving language skills and all.

Cheers,

David

David,

Yo hablo espanol, pero no se mucho de idl todavia... estoy aprendiendo, pero si necesita ayuda traduciendo, yo podria ser de servicio...

I speak spanish, but I still don't know much of IDL... I'm still learning, but if you need help translating, I could help.
