Subject: Multiple plots per page

PV-Wave 3.02 on a Sun 4/260.

I'm trying to make 2 plots on a page, stacked vertically. Page 3-14 of the Wave manual has exactly what I want:

```
!p.multi=[0,0,2,0,0]
```

and it does indeed produce two plots. But, they each only take 1/4 of the page, leaving the bottom half of the page blank. Any ideas on how to overcome this in an easy fashion? Curiously when output goes to the display it works fine, when it goes to the postscript printer it's not.
