Hi all,

Been playing with the new IDL environment under Windows and after having ironed out a number of my own specific problems, I'm in general quite happy. One thing I haven't been able to figure out however is why sometimes the keyboard shortcut for copying text within an editor is Ctrl+C, and sometimes it is Ctrl+Insert. It seems to switch back and forth between these two options, and I haven't picked up on the rhyme or reason. Bug or feature?

-Ted

Ted.

Ah, so I am not the only one for which ctrl-c stops working at time. I did not know that the copy function switches to ctrl-ins. I typically have to restart the workbench to make ctrol-c work again. Very annoying... Have you filed a bug report?

Haie
