Hello,

I am trying to access postscript symbol fonts on PV-WAVE. On the X-terminal a label using !7!3 will give me greek mu. Example

L_label='W (!7!3m)'

give W (um) {u i sgreek mu}

Is it possible to access the symbol fonts for postscript outputs when set_plot is set to 'ps'; and How??

The following construct is used for postscript outputs:

set_plot, 'ps'

device, /Helvetica,/Bold

!p.font=0
