Subject: IDLdoc updates via IDL Workbench
Posted by Michael Galloy on Wed, 06 Feb 2008 05:46:14 GMT

It's now possible (thanks to some help from engineers at ITT VIS) to get
IDLdoc updates via the update mechanism built into the IDL Workbench.
This means that you can add a new "Remote update site" that is queried
for new updates when you start the Workbench. I think this is a really
interesting way to distribute software; I hope I can "subscribe" to
other IDL libraries in the future.

For those experienced in getting Eclipse plugins, the URL is:

   http://updates.idldev.com

For more detailed instructions, see the Workench Updates page on the
IDLdoc project site:

   http://idldoc.idldev.com/wiki/WorkbenchUpdates

One note: if you already have IDLdoc in your !path, you might have to
remove it from your path to see the new version.
