Hello people,

The only thing I want is to show my value in the property sheet. I've a "problem" with that. I've a registered property as a FLOAT value and the property sheet gets the value and shows in a widget this float with 10 decimals.

If my value is 0.3 the property sheet shows 0.3000000190369...

Is it possible to change this ? If I get a value of 0.3, I want the property sheet to show the same value property.

thanks
