Subject: IDL7 content-assist - I want lower case

I like to have all lower case in my code (that's another debate). I also like to use the "content-assist" (ctrl+space) to autocomplete my keywords. However, if I use that, the keywords are upcased. I've tried the setting all the "Window->Preferences->IDL->Editor-> Formatting for content assist and code formatter" to lowercase for

all, but that doesn't do it. Any other ideas.
