Oh, hang on. This version control system is **totally** screwing me up here. I'm not working with the files I think I am working on.

Let me get this sorted out. :-(

Cheers,

David

Aaahhha! This nightmare is worse than I thought. :-(

Sorry, I "resolved" things in the wrong way and completely lost all the changes I had made, apparently. I'll have to do this over, but I can't do it today. Bummer. Sorry.
Programmer bliss.

Cheers,

David

!?!?!?!?

Bloody hell. I will include this anecdote in my Subversion tutorial to impress upon people that using the "revert" or "resolved" subversion subcommands at 2am is A Very Bad Thing(tm).

My heart goes out to you for your loss. Really. Although, you seem to be handling it well....

cheers,

paulv

OK, all well with the world, again. Thank God for version
control (and the wits to use it!). That's the *last* time
I write programs at 2AM. :-(

Cheers,

David

Is 9AM too early to have a beer?

Cheers,

David

In which time zone? :o)

Also, see:

<http://www.nytimes.com/2008/03/18/science/18beer.html?ref=science>

cheers (literally!),

paulv

LOL, not if you have been up all night.
(I was too, but with nothing that bad, just a barfing kid).

Would someone be kind enough to tell me when it is safe to
update to version 7? These posts (over the past few months)
have scared me back to command line IDL. I've got too much
work to do, to waste time battling the workbench.

Cheers,
bob
