I am not aware of anything freely available.

There is an IDL based GUI interface to MODTRAN4 here:

<http://www.rese.ch/modo/index.html>

Good luck,

Pete

I should have checked the software a bit closer, it is only for simulations with single spectra. You would have to generate the lookup tables etc... yourself - not an easy task.

have you seen the new googel groups interface

is it like that

completely unusable?
