
Subject: Wanted: Read/write SGI RGB file procedure. Other formats nice too.

Wanted: procedures to read and write SGI RGB format image files. IDL or PV-Wave procedures would be nice, but simple portable Fortran or C will do just fine.

BTW: if anyone has any other IDL or PV-Wave image file reading/writing procedures, other than those that are part of the user libraries of IDL and PV-Wave, I would love to have them.

Thanks for your help in advance.
