Dear IDL users,

I have a system whose OS is Redhat 8.0
When I install IDL 7.0 on it and run IDL, I got a error message.

```
/usr/local/itt/idl70/bin/bin.linux.x86/idl: /lib/i686/libc.so.6:  
version 'GLIBC_2.3.2' not  
found (required by /usr/local/itt/idl70/bin/bin.linux.x86/libidl.so.  
7.0)
```

If I cannot install 7.0 on Redhat 8.0, which latest version can I
install
on my system?

Thanks in advance.
