Hi,

this behavior is counter-intuitive, and may be bogus (as it does not follow the content of the help file).

If you use widget_control this way, you should select the cells to be updated first (add some row, select them, then set the value).

However, if you do:

```
data = [d0, d1 , d2, d3,d0, d1, d2, d3,d0, d1, d2, d3,d0, d1, d2,d3]  
WIDGET_CONTROL, table1, set_value=data, Table_YSIZE = n_elements(data),  
then you will see everything...
```

Jean

Wow, I did not know that you can set 'Table_YSIZE'!

This was how I 'solved' it...

```
Table = WIDGET_TABLE(base, .....,/SCROLL , YSIZE=100,  
Y_SCROLL_SIZE=10 )
```

But your solution is definitely much better!
Thanks!
