I thought I was

I want 1 x 6 to be shown, but even if I set xsize=1, ysize=6 - I still  
get scrollbars.

```
dataList = widget_table(row4,font="Arial*14" ,  
row_labels=string(indgen(6)+1, format='(I0.0)'), xsize=1, /  
no_column_headers, ysize=6, /editable)
```

Did you try explicitly setting SCROLL = 0?

```
row4 = WIDGET_BASE(/row)
```

```
dataList = widget_table(row4,font="Arial*14" ,
```

```
row_labels=string(indgen(6)+1, $
```

```
format='(I0.0)'), xsize=1, /no_column_headers, ysize=6, /editable,
```

```
SCROLL = 0)
```

```
WIDGET_CONTROL, row4, /REALIZE
```

Did you try to run that ? Does it produce no scroll bars for you?  
I still get scroll bars when I try to run it, even as a standalone widget.

Cheers,  
--Justin

That comment was not meant to be rude (:  
As I Re-read it, it may appear that way.  
Thanks for the suggestion, I was just trying to ask if it worked for you.

Thanks and Cheers,  
--Justin

```

Hi,

No Scroll bar for IDL 6.3 on Mac OSX 10.4. There is a space the  
scroll bar, but no scroll bar.

Cheers,  
Ben

P.S. No offense taken.

```

This seems to be a Windows problem. I can replicate this on WinXP Pro using IDL v6.4 and v7.0, but not on RedHat linux running v6.3. Setting Scroll = 0 doesn't make the scroll bars disappear either.

I'd say it's worth reporting as a bug, though I'm not sure I'd bet on it being fixable :-(

Regards,  
Chris
