For example, i hava an array like this:

```
 13, 14, 15, 16, 17
 23, 24,  25,26, 27
 2,   4 ,  5, 66 ,7
 13, 14, 15, 16, 17
 13, 14, 15, 16, 17
```

i know the center value is 5 .Then i want to subset the array to 3*3
and 5 is still the center. Just subset like this :

```
24,  25,26
 4 ,  5, 66
 14, 15, 16,
```

Any one has good ideas how can i do that? Thank you~
