Hello,

Does anyone have a simple example of how to create, populate, and destroy an objarr? I can create and populate (in a clumsy way) but then I cannot get rid of it using OBJ_DESTROY.

Thanks! Cindy

EX:

```
myObjArr=OBJARR(3)
myObjArr[0]=someObj
OBJ_DESTROY, myObjArr
```

```
help, myObjArr
MYOBJARR      OBJREF = Array[3]  (it's still there - why?)
```
