My understanding, after talking with someone there yesterday, is
that there were some chages made either to their server or website and
that they were "experiencing technical difficulties". I know I was
unable to log into technical support yesterday.

Still can't access the above two sites, but get our page recently
updated note on the ITT page instead of page not found.

Tried once again to upgrade IDL Workbench, I didn't get Network
Connection error, instead I see errors while it tries to retrieve
files necessary to upgrade(HTTP 500 error)

Anybody here, succesfully managed to switch to IDL 7.0.3?

Thank you.
