Subject: Re: binary_template() errors and do I have to use this?

Gotta love it when you answer your own question and impress everyone
with your ignorance :)

There really is no magic, one just has to use readu

this works great (for anyone else who reads this)
 file='cr0425.fpm
 openr,lun,file,/get_lun
 a=fltarr(10000)
 readu,lun,a
;; just get the first 100 points
 intt=indgen(100)*4
 intx=indgen(100)*4+1
 inty=indgen(100)*4+1
 inty=indgen(100)*4+2
;; plot them up.
 plot, a[intt],a[intz]

binary_template() still doesn't work but if its like ascii_template()
is too slow anyway.

Brian
