Subject: Passing Batch File Names

Hey everyone,

I have a code that calls a batch file to assign variables that I want
the main level program to have. The names of the variables and the
number may change randomly, and not by me, so I didn't want to use a
procedure where I would have to change it every time an alteration was
made in the save file.

Now, I need to execute a batch file whose name is passed by another
program. I've used call_method, call_procedure, and call_function,
but I see nothing like call_batch.

My current fix is the following:

spawn, 'cp ' + in_name+' temp_name.pro'

@temp_name.pro

This doesn't seem very clean, but it makes all of the variables
available to the main level.

Any brighter ideas?
