Ahh, I was wondering what broke my cursor routines. Gotta love "updates"

Cheers,

Brian

Did you (re)install the latest X server package from <http://xquartz.macosforge.org?>

This is usually further along than whatever is included with the OS X updates, which apparently clobber whatever working version of X one might be happily using at the time.

Hmmm, perusing the apple X11 mailing list suggests there may be something more involved happening... won't be able to update my own system until I get home tonight to see if I have the same issues.
