I have a very simple question , I have an 178*300 array, I want to read it line by line like this :

```
print,diff(53399)
print,diff(178*299+177)      ;178*299+177=53399
```

```
for i=0,177 do begin
  diff2(i)= diff(178*299+i)
endfor
```

Why it always remind me that it out of range in the second print statement. I mean 178*299+177 s exactly equal to 53399. Help~~~~~
Thank you ~
