Oh, never mind. I finally found it, but I had to log in twice to get where I wanted to be. Does anyone know how the general public is suppose to get there?

Also, does anyone know if you need *different* Virtual Machines for each platform you want to run the software on? The download page implies that you need different versions of the VM for each platform. Surely that can't be the case, can it? Maybe I'm just cranky because I see my grand plans being crushed by reality. :-(

Cheers,

David

Oh, geez, never mind the never mind.

After all that, the IDL & IDL VM installation doesn't have the capability of installing the IDL VM. Sheesh...

Is this *suppose* to be this hard!? Never mind that.
I *do* know the answer to that. :-(

Cheers,

David
