Hi,

is it possible to convert the type of an array contained in a structure?

```
IDL> help , test.data
```

```
<Expression>  INT      = Array[23]
```

```
IDL> test.data=float(test.data)
```

```
IDL> help , test.data
```

```
<Expression>  INT      = Array[23]
```

```
^^^
```

No Error, but still an INT_ARRAY

Regards

Bernhard
