I'm doing something wrong here, but what - I'm not sure...

```
IDL> help,s.tab
```

```
<Expression>  POINTER  = <PtrHeapVar26>
```

```
IDL> help,*(s.tab)
```

```
<PtrHeapVar26>  STRUCT  = -> TAB Array[2]
```

```
IDL> help,(*(s.tab))[0]
```

```
<Expression>  STRUCT  = -> TAB Array[1]
```

```
IDL> help,(*(s.tab))[0].img
```

```
<Expression>  POINTER  = <NullPointer>
```

```
IDL> (*(s.tab))[0].img=ptr_new(image)
```

```
% Attempt to store into an expression: Structure reference.
```

Any ideas why I can't assign something to this pointer?

Greg
