READFITS to read all images and WRITEFITS to write the sum. However,
looking at your previous post, this might not be what you want. What
do you mean by adding? Summation or concatenation? I don't know the
.fit format, but if 1 file can contain many images, MRDFITS()/MWRFITS
might help you.

Hello,
Thank you for your help.
I mean adding as in summation. Let say you have 20 image files in a
folder and want the output to be the sum into one file.
