
Subject: looking for app to run IDL 7 from within dos command line

I seem to remember seeing a app which would allow IDL for Windows to be run from within a DOS console window (similar to UNIX). I thought I saw it on the ITTVIS code library site but now I can't seem to find it. It was written by one of the IDL engineers, ostensibly as a proof-of-concept thing. Anyone have a link? Anyone tried it?

Thanks
