Subject: How to know if an object has a certain method ?
Posted by natha on Tue, 03 Mar 2009 18:10:36 GMT

I've an object AA and I want to know if this object has a method named
METHOD_AA...

I could do something like this:
if obj_isa(AA,'object_1') then 'the object has the method' $
else 'the object doesn't has the method'

There is another way to do that ?

Thanks
