Hi Everyone,

Heres a nice easy question for someone out there. How do you change
the background colour of IDLitWindow? In the example below you can see
the background to the right is white and I would like to set it to
black.

Cheers
Jye

PRO Background_Example

oImage = Obj_New('IDLgrImage', dist(100))

oModel = OBJ_NEW('IDLgrModel')
oModel -> Add, oImage

oView = OBJ_NEW('IDLgrView', VIEWPLANE_RECT=[0,0, 100, 100],
DIMENSIONS=[500,500])
oView -> Add, oModel

TLB = WIDGET_BASE()
Draw_oWin = WIDGET_DRAW(TLB, XSIZE=700, YSIZE=500,
CLASSNAME='IDLitWindow', $
GRAPHICS_LEVEL=2)

WIDGET_CONTROL, TLB, /REALIZE
WIDGET_CONTROL, Draw_oWin, GET_VALUE=oWin

oWin -> Add, oView

END

I learn new things every day (best thing today: IDL 6.4+ can make
animated gifs). And it certainly would not surprise me to find out there
is a way to do this with IDLitWindow, but I don't know how.

Mike
