Hi

I'm new using Idl so I need I little bit of help...

When I try to update a WIDGET_TABLE :

```
data = DINDGEN(57,2)
data_table= widget_table(col,uvalue= 'table',value=data)
```

With this :

```
widget_control, state.table, /ALL_TABLE_EVENTS,set_value = ( E)
```

E is : E = dblarr(num,2)

I get this error :

WIDGET_CONTROL: Expression must be a scalar or 1 element array in this
context: <DOUBLE Array[57,2]>.

The command widget_control why does not update the widget table
values ?

Thanks.
