I saw no issues, I saw 30 coyotes and what looked like fewer than 30 cows, a little tall for my screen so some went off the bottom I think.

IDL Version 7.0.4, Mac OS X (darwin x86_64 m64).

```

I can see cows, but not all 30 as the last 20 or so are cut off by my tiny screen.

```
{ ppc darwin unix Mac OS X 6.3 Mar 23 2006    32    64}
```

Cheers,
Ben

David,

Here's what I get:
