Sorry, the data definition is :

```
data=FLTARR(4,125,125)
data[0,*,*]=255
data[3,*,*]=0.5
```

The example doesn't works. Why ???

Thanks

ok, I found the problem....

```
a = BYTARR(4,100,100)
a[0,*,*] = 255b
a[3,*,*] = 255b
```

```
image->SetProperty, DATA=a, BLEND_FUNCTION=[3,4], $
LOCATION=[50,50], DIMENSIONS=[125,125]
```

Cheers,
Ilo
