Ronn Kling has written a dlm/dll to do this. The instructions for getting it into IDL 7 are in his presentation from the User Group meeting: http://www.rlking.com/user/image/idl_obsession.pdf

his link appears to be broken. <http://www.rlking.com/codebank/workbench/>

I've looked over his site and can't seem to find anything

Russ

Hi Russ,

it works for me - not in a browser, but by following the instructions in the pdf file. As far as I can tell, that URL isn't meant to work in a browser. You do need IDL 7.0 for it to be of any use to you, though.

Thanks for the link, Vince! Might bump into you in Hawaii next month if you're going to ISMRM?

All the best,
Chris

That would be great, but alas the budget isn't there for me to go 8^(
