I'm going to write a few posts about the contents of last week's VISualize 2009 seminar in Washington, DC, starting off with ITT VIS' presentation about the roadmap for IDL 7.1 and beyond:

<http://michaelgalloy.com/2009/04/20/idl-roadmap.html>

Hopefully these will be useful for those unable to attend. I know I had a great time, especially meeting face to face those of you I had only communicated with online previously.
