I have got a piece of idl code for computation of ambudance fraction from modis reflectance(red and nir) given below as

```
loc='d:/data/'
```

```
temp=obs(loc,use_these)
```

obs is an array that holds all image data for bands ("use_these") to be defined in endmembers;

```
FOR run=0,nrun-1 DO BEGIN
```

```
  fracs(loc,*,run)=SVSOL(REFORM(U_arr(run,*,*),ncrops,nb+1),RE FORM(W_arr  
(run,*,*),ncrops),$
```

```
  REFORM(V_arr(run,*,*),ncrops,ncrops),REFORM([[temp],[scale]] ,nb+1))
```

```
ENDFOR
```

The error comes at this line REFORM([[temp],[scale]],nb+1))

My problem is how to define "use_these" in endmembers.

any suggestion would be most welcome.

Thanks
