Welcome rfrench@titan.home to IDL Version: 7.1 !

Current time: Sun May 24 11:11:32 2009

IDL>

ps_start,file='hohoho.ps'

PostScript output will be created here: /Users/rfrench/hohoho.ps

IDL> Plot, Findgen(11), COLOR=FSC_Color('navy'), /NODATA,

XTITLE='Time', YTITLE='Signal'

%FSC_COLOR: Keyword TRUE_COLOR not allowed in call to: DEVICE

Traceback Report from FSC_COLOR:

% Keyword TRUE_COLOR not allowed in call to: DEVICE

I assume that fsc_color needs to know about the PS TRUECOLOR capabilities of IDL7.1.

Thanks for any suggestions.

Dick French
