Subject: Change structure tags from float to double Posted by Anthony[1] on Wed, 08 Jul 2009 12:28:11 GMT

Hi,

I have an array of structures, with many tags, including "table.ra" and "table.dec", which are floats

I want to change "table.ra" and "table.dec" to double precision.

Is there an easy way of doing this? (Optimistic question, I know...)

Thanks in advance!

Anthony
