Hi David, perhaps as an addition to your chicory posting:

In Germany it is called Wegwarte "waiting on your path" (relation to IDL?).

Perhaps it has something to do with Novalis' blue flower. On the poorest pieces of soil they are growing. And I feel myself always greeted by the Wegwarte!

Yanking these plants out by their roots is the only way to get it, otherwise you need tools to cut it.

Possibly the chicori;½e-coffee is known in the US too. It is prepared from their roots.

Regards and more pleasure
Karsten

I would have bet these flowers were growing in Bavaria, too.
Just about the only place in the world more beautiful than
our local environs. I miss it, and those long walks afield
with you, learning the strange new names of well-known
flowers. :-)

Gruss Gott!

David
