The Savitsky-Golay filter is discussed in Num.Rec. (2nd Edit.)  
pg. 652. I am considering trying to write it in IDL, but am  
wondering if anyone might already have done this.

Any pointers would be appreciated.

Sincerely,  
Russ Welti

You can find a procedure to apply a Savitzky-Golay filter in the Astronomy User's  
Library. It is called POLY\_SMOOTH and can be found in the Math directory.

Regards,

Michele Scutter
