I'm having a bit of trouble installing the AVI plugin from Ronn Kling. I have installed the plug in via the Eclipse update mechanism. The workbench tells me it is not installed correctly: under Status it says "No plug-in: "com.rkl Kling.idl.contrib.avi.windows" included at runtime."

(I did not even get that much information until I moved the MANIFEST.MF file into a META-INF subdirectory. Prior to that the Status told me "Plug-in "com.rkl Kling.idl.contrib.avi.windows" version "2.0.0" referenced by this feature is missing.")

Now when I try to run (for example) the fastAVIdisplay example code, I get this error:

```
% OBJ_NEW: Error loading sharable executable.  
    Symbol: IDL_Load, File = C:\3rd  
    Party\ITT\IDL708\idlde\plugins  
\com.rkl Kling.idl.contrib.avi.windows_2.0  
    .0\KRSgrAVI.dll  
    This application has failed to start because the  
application  
    configuration is incorrect. Reinstalling the application  
may fix this  
    problem.  
% Execution halted at: FASTAVIDISPLAY   26 C:\3rd  
    Party\ITT\IDL708\idlde\plugins  
\com.rkl Kling.idl.contrib.avi.windows_2.0.0\fastAV  
    Idisplay.pro
```

Obviously I have already tried uninstalling and reinstalling the plug in, but alas.

Any ideas what missing?
