Hi, everyone.

On IDL 7.1.1 under Windows, there seems to be a small problem about the procedure HISTOPLLOT.

For example,

```
Histoplot, Dist(256), xrange=[0, 187]
```

```
Histoplot, Dist(256), xrange=[0, 188]
```

The figures are both wrong and very different.

I don't know why these errors happen.

Best regards,

jdu
