Add a reform call to your new indices such that these lines:

```
new_x_indices = new_indices[0, *]  
new_y_indices = new_indices[1, *]
```

become this:

```
new_x_indices = reform(new_indices[0, *])  
new_y_indices = reform(new_indices[1, *])
```

And it appeared to work for me.

Hi,

That worked for me too. Thank you very much.

Do you know why the reform call was needed?

Robin
