Folks

Hi;

I used to take free satellite data like: Landsat, SRTM, Modis,....

From

this web site: <http://glcfapp.umiacs.umd.edu:8080/esdi/>.

Unfortunately

it is not working for few days. Does anyone have any idea for other  
fee data websites?

Any help highly would be appreciated

Dave

P.S. I need some elevation and optic data from southwest of Italy  
(Sicily area).

If you register with

<https://wist.echo.nasa.gov/api/>

you can apply for free access to imagery (research or teaching purposes). I've been getting free ASTER and MODIS imagery there for quite some time, which I find very generous. European Agencies are much more restrictive and bureaucratic.

Mort

Thank you Mort.  
Cheers
