Dear Jonathan,

I'm running your rois\_to\_csv.pro script but I'm getting the following error message:

```
% Out of range subscript encountered: ADDR.  
% Execution halted at: ENVI_ROI_GET_ADDR  
% ENVI_GET_ROI_DATA  
% ROIS_TO_CSV 42 D:\enviscripts\rois_to_csv.pro  
% $MAIN$
```

I understand it has to do something with the ROI address but I haven't managed to figure out what. Can you please help me solving this problem? Thanks in advance, Eva.
