Don't you mean

if (date eq '25052009') then XYOUTS, 23.67,46.8, 'C', COLOR=253

?

Basically, it means the syntax of your XYOUTS command
is wrong, and that "C" can't be used as a location
variable. Maybe you meant to type this:

if (date eq '25052009') then XYOUTS, 23.67, 46.8, 'C', COLOR=253

Cheers,

David

Well, I think I tried this first but got an error, then I tried this notation. But hey, new day new luck. Now everything works fine. Seems yesterday was the day of the typo. Had another one that kept me banging my head against the wall for hours.

Thx.

Johannes
