I have a new post up about rIDL, an enhanced command line interface to IDL:

<http://michaelgalloy.com/2010/01/07/ridl-development.html>

It's not ready for "release", but a pretty good time for people to poke around at it. The Makefile will build on Mac OS X, check the comments of the post for a Makefile for Linux. (I'll have to Autotools-ize this project soon.)

Check out the original article for a screencast of using rIDL:

<http://michaelgalloy.com/2009/07/29/ridl-an-idl-command-line-replacement.html>

Mike
