Dear All,

I have problems typing greek and mathmatical symbols in my plots. For
example, \frac{a}{b} seems impossible for me to type. I thought
textoidl might help, however, I found that it only supports for latex
greek symbols, not math symbols. Besides, it seems that ps font is
not supported? On the documents it says that the keyword "font" can be
set, but in practice, the program echos error message when I set the
keyword. Anyone has ideas?
