I was disturbed by the followup to a message I posted the other day, and I wasn't sure whether to reply or not. The message is from Alan Stein at MIT/Lincoln Lab. Some excerpts follow:

I don't know Alan, so I can't say what would have prompted this sort of personal attack on me or Precision Visuals, Inc. I believe that we provide high-quality software at a competitive price, and that we have an outstanding engineering group. I'd guess that any of the staff at RSI would say the same about themselves.

I sincerely hope that my fellow netters (and the sysadmin that controls Alan's net access) will agree to get the discussions on this newsgroup back on a more professional level.
