If you use mgunit or have a need for doing unit testing in IDL, I just released mgunit 1.1:

<http://michaelgalloy.com/2010/02/22/mgunit-1-1.html>

This version adds the ability for a test to indicate it should be skipped, new output formats (XML and a JUnit compatible format), added convenience in constructing error messages with ASSERT, and some bug fixes.

Mike
