
Subject: MOD09 Data in ENVI

Folks,

OK, I'm going crazy. I have some MOD09GA MODIS reflectance data in that crazy sinusoidal map projection that I am *certain* I have processed in ENVI before. (In fact, I have ENVI files to prove it.) But today ENVI is telling me it doesn't recognize those files.

I've done some file cleanup today. Did I delete something ENVI needs to process these files?

Confused,

David
