Hi friends,

I'm planning to implement Speech Recognition using IDL ,
Please let me know whether it is possible to implement Hidden Markov
Model using IDL (Or) to call C language code from IDL to implement
HMM.

Thanks in Advance,
Arun

I said IDL could do it because IDL is turing complete. I think this
means you can solve any solvable programming problem in it. I don't
know that anyone has yet...

If you use a search engine, you'll find tutorials and implementations
and sample code that you should be able to translate into IDL.

-k.
