From the ITTVIS Website:

<http://www.itvis.com/ProductServices/IDL/VirtualMachine.asp> x

"In cases when a developer does not wish the IDL VM splash screen to appear, when IDL is tightly integrated with other software applications or software environments, or when a developer wishes to license an application to customers with the IDL environment, ITT offers additional distribution models and licensing options tailored to the needs of the software developer."

My guess is you need to contact them to find out more.

Yeah, and bring your wallet. :-)

Cheers,

David

but why on some computers (operative systems? ) the splash screen does

not appear? the same .sav file on my laptop (with windows XP 32 bit)

starts without the splash screen, on my desktop (XP 64 bit) starts

with the splash screen ...
